Oroville Dam Auxiliary Spillway Incident

On 04/29/17 at 1344 hours the Department of Water Resources (DWR) advised the California State Warning Center (CSWC) that they were decreasing the flow to manage Lake Oroville's water surface elevation and to safely close the Flood Control Spillway.

- The Hyatt Powerplant outflow has increased from 0 cfs to 8,000 cfs.
- The Oroville Dam Flood Control Spillway flow will eventually be curtailed from 35,000 cfs to 0 cfs.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 05/06/17 at 0600 hours](#):

- Inflow: [22,892](#) cfs.
- Outflow: [7,943](#) cfs.
- The current lake elevation is [842.99](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – On Scene.

SITUATION SUMMARY

Cal OES COASTAL REGION

Valero Refinery Flaring Incident, Benicia, Solano County

At 0704 hours, the CSWC received a report that the Valero Refinery in Benicia, Solano County experienced a power interruption resulting in a flaring incident.

- Per Cal OES Law Duty Officer (LDO), the Benicia Industrial Park was evacuated and the industrial park closed to include the offramp from I-680. Evacuees were directed to the Benicia Community Center.
- Westerly winds pushed smoke east of the incident.
- As of 1402 hours, the shelter-in-place orders in place for Matthew Turner and Robert Semple Elementary Schools were lifted.
- Per Cal OES Coastal Duty Officer (CDO), the City of Benicia activated their Emergency Operations Center (EOC) and Solano County activated their EOC to monitor the incident.
- Solano County closed their EOC at 1402 hours, but continues to work with the City to provide updates as needed.
- State Air Resources Board deployed three E-BAM particulate monitors for community air monitoring.
- Power was restored to the refinery and efforts are underway to control the release.
- As of 1630 hours, the City reported that pollutants in the air have begun to dissipate.
- There are no requests for state assistance at this time.

Bay Area Rapid Transit (BART) track closures

BART plans to close the tracks between Fruitvale and Lake Merritt Stations to perform vital repairs on select weekends through July. The next closure is planned to occur this weekend: 05/06/17-05/07/17.

- During the closures there will be no train service between Fruitvale and Lake Merritt and the Lake Merritt Station will be closed.
- A free bus bridge will operate between Fruitvale and 19th St. Stations in Oakland to shuttle riders around the closure.
- Riders on the Fremont, Dublin and Oakland Airport lines will be impacted adding 20 to 40 minutes to travel times.

Train Derailment, Mira Loma, Riverside County, Hazardous Materials Spill Report #17-3258

On 05/05/17 at 2148 hours, Union Pacific Railroad reported that two auto rack cars derailed upright.

- There is no hazardous materials release and no injuries.
- Crews were enroute for re-rail operations.
- CSWC personnel performed notifications per SOP.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 04/27/17, Hwy 1 from the south is closed at Ragged Point and is open at specific intervals to local traffic only. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Placer County:

- Truckee River at Truckee is forecast to be above flood stage at 4.8 feet the morning of 05/07/17.
 - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.

Mariposa County:

- Merced River at Yosemite at Pohono Bridge is forecast to be at or above flood stage at 10.8 feet and is receding.
 - Potential Impacts: Water tops the swinging bridge downstream from Chapel Meadow. Overflow from Woski Pond floods access road (Northside Drive) leading out of the west entrance of the park.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Plumas County: Middle Fork Feather River at Portola
- Alpine County: West Fork Carson River at Woodfords, East Fork Carson River at Markleeville
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevenson

WEATHER OF CONCERN

Weather of Concern

- A cold low pressure system developing over California will bring strong gusty winds, scattered light showers and snow to mountainous areas..
- Snow levels are expected to be between 4500 and 7000 feet.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

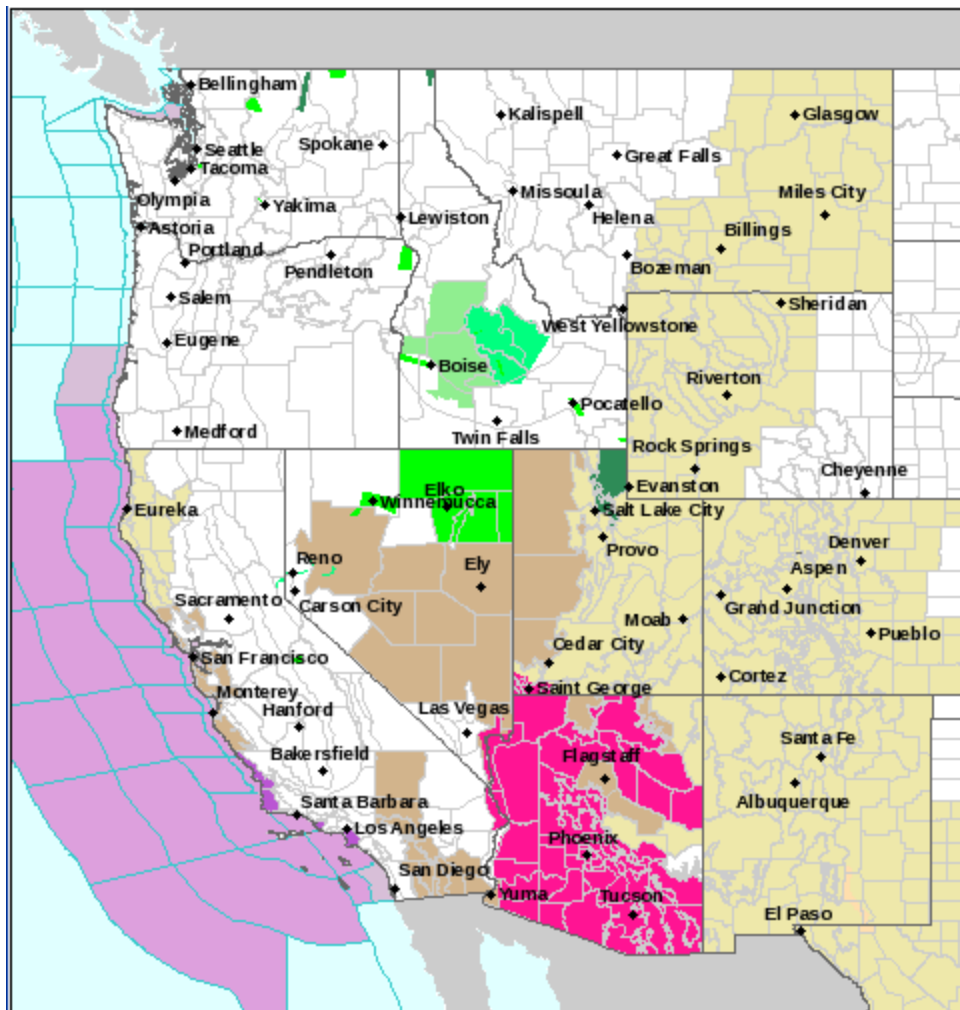

NORTHERN CALIFORNIA

A trough will move inland today and a closed/cut off low will split from the trough and move south toward the Central California coast late today. Showers and thunderstorms today will be confined to eastern and southern areas. Tomorrow the low will move to far SE California and only a few showers or thunderstorms are possible in the far SE corner of the region. The remainder of the region will be mild and mostly clear today and tomorrow. Winds throughout the region will be out of the NW-NE today and tomorrow, with peak gusts reaching 30-40 mph in wind-prone areas. Temperatures will be 5-10 degrees below normal through tomorrow. High pressure will move over the region Monday and Tuesday and produce warmer and drier weather. Temperatures will be near to slightly above normal. Another low pressure trough will reach the coast next Wednesday and bring more thunderstorm chances through the end of the week.

SOUTHERN CALIFORNIA

Low pressure will form over the region today and then sit and spin in the vicinity through Monday bringing scattered showers and thunderstorms. Most locations across the region and the Sierra will receive between a quarter inch and an inch of rainfall, while the rest of Central California receives less than a quarter inch of rainfall. The snow level will be between 5,000 and 6,000 feet. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes this afternoon through tonight. Temperatures will be well below average this weekend as the low pressure area moves overhead and then temperatures will gradually warm early next week as the low pressure moves slowly eastward. A weak ridge of high pressure will bring near to a little above normal temperatures and a significant drop in humidity Wednesday and Thursday.

Cal OES MISSIONS

Cal OES Missions

- **2016-IREOC-21748:** Tasking Caltrans to extend state highway right of way to facilitate hazard tree removal. This is a long term mission and is expected to remain in place through the summer months. **Mission Ongoing.**
- **2015-IREOC-19846:** One RAWS weather station to Amador OA – On scene 11/30/15, expected to be left in place until May 2017. **Mission Ongoing.**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
